**REPORT : ACCEPTABILITY STUDY****IN-USE TEST UNDER DERMATOLOGICAL CONTROL**

CLINICAL STUDY FOR THE APPRAISAL OF THE CUTANEOUS ACCEPTABILITY OF A COSMETIC INVESTIGATIONAL PRODUCT, APPLIED UNDER NORMAL CONDITIONS OF USE, FOR 3 WEEKS, IN BOTH SEX ADULT SUBJECTS

INVESTIGATIONAL PRODUCT : **SPRAY PROTECTOR CON ACEITE ÁRBOL DE TE ORGÁNICO**  
(ref.: APLMIB005 - Lote: M13220)

LABEX PRODUCT CODE : E200119 376005

EXPERIMENTAL PROTOCOL N° : PE200016G, of 29 June 2020

REPORT N° : E200119RD version 1, of 26 June 2020

START OF OBSERVATIONS : 19 May 2020

END OF OBSERVATIONS : 11 June 2020

## CONCLUSION

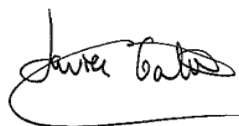

The CUTANEOUS ACCEPTABILITY of the investigational product designated as:

“SPRAY PROTECTOR CON ACEITE ÁRBOL DE TE ORGÁNICO (ref.: APLMIB005 - Lote: M13220)”

can be judged, on the whole, as VERY GOOD, after repeated applications under normal conditions of use, 2 to 3 times a week, during 3 consecutive weeks, on the hair, by 23 healthy adult subjects of both sexes.

The claim such as “TOLERANCE TESTED UNDER DERMATOLOGICAL CONTROL” can thus be justified.

Barcelona, 26 June 2020
